Personal Statement

My name is David Sohn, and I am an orthopedic surgeon specializing in Shoulder and Sports Medicine. I believe in compassionate, ethical care, and truly enjoy working as a physician. I am active in research, teaching, publications, peer reviews, advocacy and leadership.

Education and Training

Duke University Hospital Program 7/1/2007 – 6/30/2008
NC
Orthopedic Shoulder and Sports Medicine

Beaumont Health (Royal Oak and Taylor) Program 12/1/2004 – 6/30/2007
MI
Orthopedic Surgery

Stanford 7/1/2003 – 11/30/2004
Palo Alto, CA
Orthopedic Surgery

Stanford 6/22/2002 – 6/30/2003
Palo Alto, CA
General Surgery

University of California San Diego School of Medicine 1998 – 2002
CA

Harvard 1990 – 1993
Cambridge, MA

Experience

Chief, Shoulder and Sports Medicine 9/1/2008 –
University of Toledo Medical Center
Toledo, OH

I am an active clinician as well as both clinical and didactic lecturer for orthopedic residents and fellows, post graduate residents in PMR, Family Medicine, and ER, and the medical school. I also serve on the Surgical Care Improvement Project, as well as the Orthopedic Education Committee. I also helped create the University of Toledo JD/MD Program, and have been the Medical Advisor for this program since its inception in 2015.

Licenses & Certifications	Ohio	Licensed
	ABOS Board Certified	
Presentations	<p>Tranovich M, Lather J, Sohn DH Correlation Between MRI and Arthroscopy Findings in Complex Shoulder Reconstruction ARRS Annual Meeting New Orleans, LA</p>	04/30/2017

	<p>Fleeter T, Arnstein P, Ring D, Sohn DH Instructional Course Lecture: Risk Evaluation and Management Strategies for Prescribing Opioids AAOS National Meeting 03/2/2016 (Orlando, FL) 03/05/2015 (Las Vegas NV)</p>	
Research	<p>Lead Investigator Viability of Osteocytes and Periosteum Following Arthroscopic Radiofrequency Ablatio UTMC We used a bovine model to see the effect of three common instruments used in rotator cuff surgery (shaver, RF coagulation, RF ablation) on the underlying osteocytes and vasculature. We found there was significantly more necrosis with RF ablation than with RF coagulation or shaving. Manuscript in submission</p>	03/15/20 –
Teaching	<p>Professor UTMC Toledo, OH</p>	09/01/2009 –

Grants

National Science Foundation

Mentoring: Jacob Meier, Marilee Clunk
Amount: \$\$2,500

This grant will fund a cadaveric study looking at the effects of athletic ankle taping on the stresses necessary to create low and high ankle sprains

06/01/2021

National Science Foundation

Mentoring: Danielle Barnes
Amount: \$\$2,500

This grant will fund a clinical study looking at the accuracy of the Lelli test compared with the Lachman and the Pivot Shift test for the diagnosis of ACL injuries

06/01/2021

Johnson & Johnson

Mentoring: Michelle McLeod
Amount: \$\$5,000

This grant funded research looking at quadricep strength recovery before and after knee arthroscopy for meniscal tears.

07/01/2017

NIH

Mentoring: Robert Sah
Amount: \$\$2,500

This grant funded a tissue culture study on the localization of transplanted chondrocytes in Carticel surgery

06/01/1999
